

# SCHUHL & CO

Manufacturer of Nuts and cold formed parts  
to DIN EN ISO or drawing in steel, light alloy and  
nonferrous metals, COMBY®-Nuts.

As a midsized, family based company Schuhl & Co. GmbH serves the automotive, electric and electronic market and their suppliers with nuts and coldformed parts for problem solvings in fastening technologies.

We are specialized in parts range from M3 to M24 with captive mounted, turning washers, called Comby®-Nuts as well as square, hexagon and rectangular nuts.

Also weld nuts in different shapes are part of our production.

In using an uncommon coldforming technology, Schuhl & Co. is able to produce parts, which could not be manufactured by known nutformers.

Due to this technique, high alloyed steel, stainless steel, Inconel or titanium can be formed as well.

Certified to DIN EN ISO 9001 / TS 16949 Schuhl & Co. GmbH supplies the international market for more than 70 years.

Even uncommon geometries or small volumes can be offered.

Your inquiries will be highly appreciated
